

Sickle Impeller Fan series

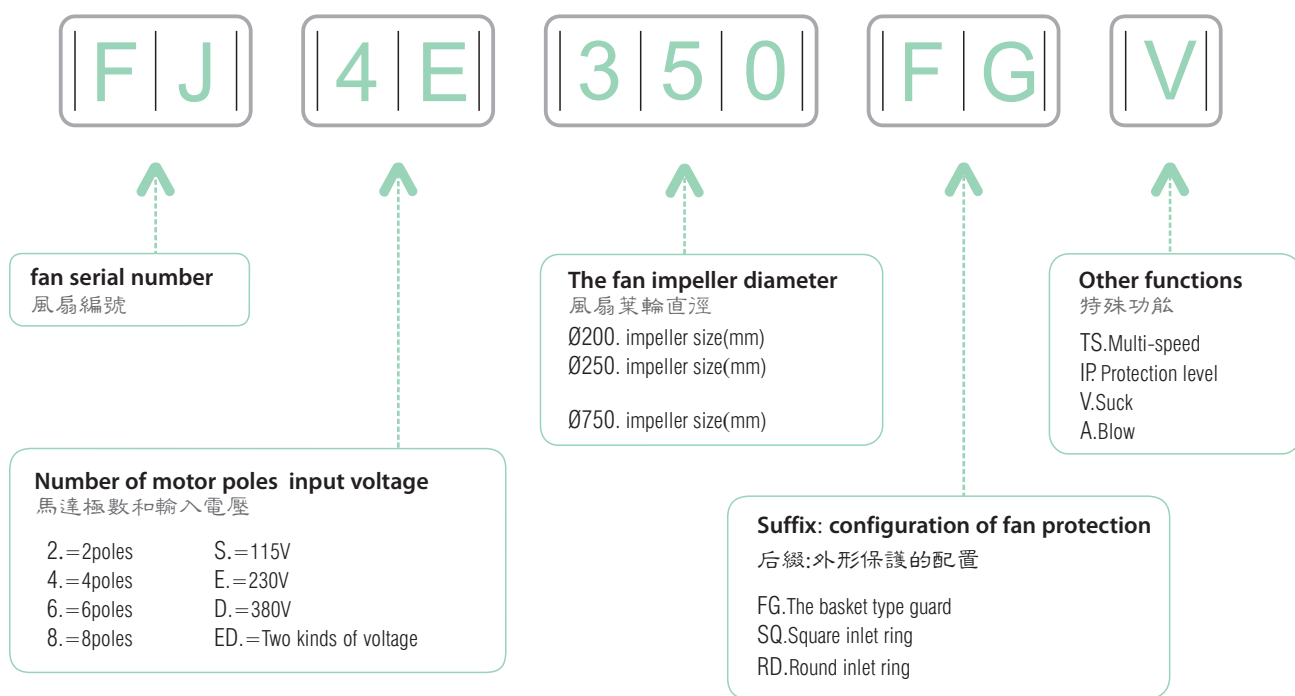

鐮刀式葉輪系列

- Compact configuration can save maximum space for users.
- External rotor capacitor type motor can be designed with 2 poles, 4 poles, 6 poles or 8 poles, which can meet the needs of different fields.
- Various kinds of models, sizes and air performance for selection.
- Different speeds and air flow are available by circuit design modulation, which generates different voltages.
- With low noise and remarkable efficiency, it is suitable for refrigeration unit.
- The integral combination of motor and impeller realizes double-faced balancing.
- IP55 grade fan is available.
- Wide choice for fan accessories: protection guard, basket-type guard, capacitor, connection box, connecting wire and so on.
- The fans have approvals of CSA, CE, CCC and RoHS.
- 緊湊的外形能最大限度為用戶節省空間
- 外轉子電容式電機可以設計兩極四極六極八極，並滿足不同的領域
- 品種多樣，尺寸和空氣性能方面有不同的選擇
- 可通過電路設計調制，滿足各種電壓，實現幾種速度的轉速和風量
- 擁有極低的噪音，卓越的效率，適用於制冷裝置中
- 電機和風葉的整體結合，實現雙面動力平衡
- 可提供防護等級為IP55的風機
- 附件選擇廣泛，保護網罩，籃筐式網罩，電容器，接線盒，連接電綫及其他的零件
- 獲得CSA,CE,CCC和RoHS認證

Common Models description

常規型號說明

Reference based on the size of impeller, which helps you to quickly select the best choice for your installation

引用基于葉輪尺寸,這能讓你快速選擇你安裝的最佳選擇

Example:

When you need fan motor 4 poles, input voltage 230V, impeller diameter Ø 350 mm,

> please choose FJ4E - 350

當你選擇風扇電機為4極,輸入電壓230V,葉輪直徑Ø 350mm,請選擇 FJ4E-350

When you need 4 poles, impeller diameter 350 mm, fan needs basket-type protection guard, airflow direction from motor to guard,

> Please choose FJ4E - 350.FGV

當你選擇4極350mm直徑葉輪,風扇外部須安裝籃筐網罩保護,風扇出風的方向是電機吹向網罩時,請選擇 FJ4E-350.FGV

> We can customize your unconventional products.

我們可非常規量身定制您的產品
